

Business value	Story name	Story description	Estimation
2000	use database	As a user I want to use the application fast even if there are lots of data in it, I want to reach data if another user uses it and I want the possibility to back up the data so if some data is lost then it is easily recoverable (hint: use PostgreSQL database instead of csv files; you don't have to implement backup now).	6
1200	add comment to question	As a user I want to add comments to a question. There should be a link or button on the question page with which I can reach the new comment page (/question/<question_id>/new-comment). The comment should be visible on the question page.	3
1100	search questions	As a user I want to search in questions & answers. There should be a search box on the main page and a button. If I write something in the search box and press the button, I want to see a list of all questions (same data as in the list page) which title or description contains the searched phrase or which have answers which message contains the text in the search box. (/search?q=<search phrase>)	2,5
1100	add comment to answer	As a user I want to add comments to an answer. There should be a link or button on the question page next to or below the answer with which I can reach the new comment page (/answer/<answer_id>/new-comment). The comment should be visible on the question page together with its submission time.	3
1000	edit answer	The site should allow to edit the posted answers. (/answer/<answer_id>/edit)	3
800	display latest questions	As a user, I want to see the latest 5 submitted questions on the main page (/). I want to see somewhere a link to all of the questions (/list).	1
800	edit comments	As a user I want to edit comments of a question or an answer (/comments/<comment_id>/edit). After editing there should be a text like "Edited <number of editions> times." next to or below the comment on the question page and the comment should show the updated text and the new submission time.	2
800	delete comments	As a user I want to delete comments of a question or an answer (/comments/<comment_id>/delete) by clicking a recycle bin icon next to the comment. After deletion the comment shouldn't be showed on the question/answer page. Force the user to confirm the deletion.	1
700	vote	There should be a "vote up" and a "vote down" button besides each question and answer. Each one increases/decreases the vote count for them respectively. After sending a vote the page should reload to display the updated vote count. (/question/<question_id>/vote-up and vote-down)	2
600	sort questions	The list of questions should be sortable according to: date, votes, number of views (both in ascending and descending order) (for example /list?time=asc&title=desc,...) [If you did this user story in the previous sprint, now you only have to rewrite it to use SQL]	3
